* XDELETE            *  
*  
* Macro to delete a SAS format dataset            *  
*  
* Author: Fabrizio Carinci (carinci@cmns.mnegri.it) - revised from Warren Saarle, SAS           *  
* Birth Date: 1995            *  
*  
* SAS 6.12 TS060 Modules: BASE            *  
*  
* Platform: Windows NT4.0            *  
*  
* First Release: March 1995            *  
*  
* Last Major revision: June 1995            *  
*  
* Modified: By IB 2001            *  
*  
* Parameters: (!=required)            *  
*  
* ! LIST list of datasets to be deleted            *  
*  
* If &list=_ALL_ the deletes all datasets in WORK library            *  
*  
* Example:            *  
*  
* %XDELETE(ONE);            *  
*  
*  */  

%MACRO XDELETE(list);  
  %if %bquote(&list)^= %then %do;  
    %if %bquote(&list)^=ALL %then %do;  
      PROC DATASETS NOLIST;  
      DELETE %UNQUOTE(&LIST) / MEMTYPE=DATA;  
      QUIT;  
  %end;  
%end;
%End;

%if %bquote(&list)=_ALL_ %then %do;
  PROC DATASETS library=work mtype=data kill;
  QUIT;
%End;
%end;

%MEND XDELETE;
