VITAL STATISTICS OF THE UNITED STATES, 1969

VOLUME III—MARRIAGE AND DIVORCE

A brief summary of the contents for each section is listed below for the convenience of the reader. A complete table of contents is shown at the beginning of each section and is identified by a narrow black edge which can be located easily by fanning the pages. Each section is paged independently, using the section number as the identifying prefix.

Section 1. Marriages

For the United States:

National trend data.

Marriage totals and rates for each State, division, and region.

Marriage totals for each county or county equivalent.

Monthly marriage totals for each State, division, and region.

For the marriage-registration area:

Marriages classified by major demographic characteristics of bride and groom and by characteristics of marriages performed in each participating State; marriage rates specific for sex, age, and marital status.

Section 2. Divorces

For the United States:

National trend data.

Divorce totals and rates for each State, division, and region.

Divorce totals for each county or county equivalent.

Trend of national totals of children involved in divorce.

For the divorce-registration area:

Divorces classified for each participating State by major demographic characteristics of husband and wife, characteristics of their marriage, and number of children.

Section 3. Technical Appendix

Historical and contemporary sources of marriage and divorce statistics, design of the samples of marriages and divorces and annulments, variability of sample estimates, and uniformity and completeness of the reporting forms and the collected data. Tables of population estimates used as bases for rates.

Section 1. Marriages

Table	Page
1-1. Estimated number of marriages and marriage rates with percent changes from preceding year: United States, 1920-69, and marriage-registration area, 1957-69-----	1-5
1-2. Estimated marriage rates per 1,000 men and women 15 years of age and over: United States, 1940-69-----	1-5
1-3. Estimated marriage rates per 1,000 unmarried women 15 years of age and over and 15-44 years of age: United States, 1940-69-----	1-5
1-4. Estimated number of marriages and marriage rates, by month, with and without seasonal adjustments: United States, 1960-69-----	1-6
1-5. Marriages and marriage rates: United States, each region, division, and State, 1965-69-	1-7
1-6. Marriages by month: United States, marriage-registration area, each region, division, and State, 1969-----	1-8
1-7. Marriage rates by previous marital status and age: Marriage-registration area, 1969--	1-9
1-8. Median and first and third quartiles of age at marriage for brides and for grooms, by previous marital status of each partner: Marriage-registration area, 1969-----	1-9
1-9. Median and mean age of bride and groom, by specified age of spouse at first marriage of both: Marriage-registration area, 1969-----	1-10
1-10. Percent distribution of marriages by previous marital status of bride and groom: Marriage-registration area and each registration State, 1969-----	1-10
1-11. Percent distribution of marriages by marriage order of bride and groom, by color: Marriage-registration area and each registration State, 1969-----	1-11
1-12. Percent distribution of marriages by month marriage performed, by marriage order and color of bride and groom: Marriage-registration area, 1969-----	1-11
1-13. Percent distribution of marriages by resident status of bride and groom in State where married: Marriage-registration area and each registration State, 1969-----	1-12
1-14. Percent distribution of all marriages, first marriages, and remarriages of bride and groom by age at marriage, and median age: Total of 22 selected States, 1960-69-----	1-13
1-15. Marriages by marriage order, age, and color of bride and groom: Marriage-registration area, 1969-----	1-14
1-16. Remarriages by age, previous marital status, and color of bride and groom: Marriage-registration area, 1969-----	1-14

1-17. Marriages by marriage order and age of bride and groom: Each marriage-registration State, 1969-----	1-15
1-18. Marriages by age of bride, by age of groom: Marriage-registration area, 1969-----	1-18
1-19. First marriages of both bride and groom, by age of bride, by age of groom: Marriage-registration area, 1969-----	1-18
1-20. Marriages by age and previous marital status of bride, by age of groom (all grooms and single grooms): Marriage-registration area, 1969-----	1-19
1-21. Marriages by age and previous marital status of groom, by age of bride (all brides and single brides): Marriage-registration area, 1969-----	1-20
1-22. Marriages by age of widowed and divorced brides, by age of widowed and divorced grooms: Marriage-registration area, 1969-----	1-21
1-23. Marriages by age of bride and by age of groom, by color: Marriage-registration area, 1969-----	1-21
1-24. Marriages by previous marital status and color of bride and of groom: Marriage-registration area and each registration State, 1969-----	1-22
1-25. Marriages by previous marital status of bride and groom, by color: Marriage-registration area, 1969-----	1-24
1-26. Marriages by number of this marriage of bride and of groom: Marriage-registration area and each registration State, 1969-----	1-25
1-27. Marriages by marriage order and age of bride and groom, by month marriage performed: Marriage-registration area, 1969-----	1-26
1-28. Marriages by marriage order and color of bride and groom, by month marriage performed: Marriage-registration area, 1969-----	1-27
1-29. Marriages by day of week marriage performed: Marriage-registration area and each registration State, 1969-----	1-27
1-30. Marriages by resident status of bride and of groom in State where married: Marriage-registration area and each registration State, 1969-----	1-28
1-31. Marriages by marriage order and age of bride and groom, by resident status of bride and groom in State where married: Marriage-registration area, 1969-----	1-29
1-32. Marriages by marriage order and age of bride and groom, by resident status in State where married: Marriage-registration area, 1969-----	1-31
1-33. Marriages by marriage order of bride and groom, by nativity status in State where married: Marriage-registration area and each registration State, 1969-----	1-32
1-34. Marriages by marriage order, resident status, and nativity status of bride and groom in State where married: Marriage-registration area, 1969-----	1-35
1-35. Marriages by nativity status and resident status of bride and groom in State where married: Each marriage-registration State, 1969-----	1-36
1-36. Marriages by previous marital status of bride and groom, by resident status in State where married: Marriage-registration area and each registration State, 1969-----	1-41
1-37. Marriages: United States, each State and county, 1969-----	1-47

Sampling Variability of the Marriage Statistics

In the tables which present statistics based on data from probability samples of marriage records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 3-6 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown below. Figures for States shown as "zero" indicate that all records were tabulated and thus data are not subject to sampling variability.

Marriage-registration area -----	150	Massachusetts -----	100
Alabama -----	100	Michigan -----	225
Alaska -----	0	Mississippi -----	50
California -----	225	Missouri -----	100
Connecticut -----	50	Montana -----	15
Delaware -----	0	Nebraska -----	50
District of		New Hampshire -----	15
Columbia -----	15	New Jersey -----	100
Florida -----	100	New York (including New York City) -----	225
Georgia -----	225	North Carolina -----	100
Hawaii -----	15	Ohio -----	225
Idaho -----	50	Oregon -----	50
Illinois -----	225	Pennsylvania -----	225
Indiana -----	100	Rhode Island -----	15
Iowa -----	50	South Dakota -----	15
Kansas -----	50	Tennessee -----	100
Kentucky -----	100	Utah -----	15
Louisiana (including New Orleans) -----	50	Vermont -----	0
Maine -----	15	Virginia -----	100
Maryland -----	100	West Virginia -----	50
		Wisconsin -----	100
		Wyoming -----	0

Table 1-1. Estimated Number of Marriages and Marriage Rates With Percent Changes From Preceding Year: United States, 1920-69, and Marriage-Registration Area, 1957-69

[Figures for the MRA differ from those shown in tables based on sample data. Rates per 1,000 population residing in area]

SECTION 1 - MARRIAGES

Table 1-4. Estimated Number of Marriages and Marriage Rates, by Month, With and Without Seasonal Adjustments:
United States, 1960-69

[Rates on an annual basis per 1,000 estimated population for specified month. The number and rates of marriages by month adjusted for seasonal variation are the figures that would have occurred during the month if the characteristic seasonal pattern of marriages observed during the years 1960-69 had been eliminated]

Item and year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
NUMBER OF MARRIAGES												
Unadjusted for Seasonal Variation

SECTION 1 - MARRIAGES

1-9

Table 1-7. Marriage Rates by Previous Marital Status and Age: Marriage-Registration Area, 1969

[Based on sample data. Rates per 1,000 population in specified group. Rates for all marriages are based on unmarried population, those for first marriages are based on single population, and those for remarriages are based on widowed and divorced population. Figures for widowed and divorced, but not for all remarriages, exclude data for Michigan and Ohio. All marriages include previous marital status not stated; all remarriages include widowed or divorced not stated]

Previous marital status and age	Bride	Groom
ALL MARRIAGES		
14 years and over-----	67.4	81.9
14-17 years-----	26.1	3.7
18-19 years-----	165.4	76.9
20-24 years-----	249.5	201.7
25-44 years-----	123.3	169.7
45-64 years-----	21.5	53.9
65 years and over-----	2.4	14.9
Median age-----	21.6	23.5
Mean age-----	25.1	27.7
FIRST MARRIAGES		
14 years and over-----	87.9	73.8
14-17 years-----	25.4	3.6
18-19 years-----	189.4	75.3
20-24 years-----	234.6	192.5
25-44 years-----	92.4	124.0
45-64 years-----	9.9	13.6
65 years and over-----	0.9	2.7
Median age-----	20.6	22.4
Mean age-----	21.6	23.8
ALL REMARRIAGES		
14 years and over-----	36.7	117.9
14-24 years-----	432.9	521.1
25-44 years-----	157.1	329.7
45-64 years-----	24.9	102.0
65 years and over-----	2.5	19.0
Median age-----	33.8	38.2
Mean age-----	36.9	40.9
WIDOWED		
14 years and over-----	10.3	39.3
14-44 years-----	74.7	146.2
45-64 years-----	17.5	83.1
65 years and over-----	2.3	17.7
Median age-----	51.3	59.0
Mean age-----	50.4	57.7
DIVORCED		
14 years and over-----	135.4	220.8
14-24 years-----	477.6	494.9
25-44 years-----	190.6	351.9
45-64 years-----	45.6	113.2
65 years and over-----	7.0	29.3
Median age-----	30.4	34.7
Mean age-----	33.0	36.9

Table 1-8. Median and First and Third Quartiles of Age at Marriage for Brides and for Grooms, by Previous Marital Status of Each Partner: Marriage-Registration Area, 1969

[Based on sample data. Computed on totals excluding figures for previous marital status not stated. Figures for widowed and divorced exclude data for Michigan and Ohio]

Previous marital status of bride by previous marital status of groom	Estimates of age					
	Bride			Groom		
	First quartile	Median	Third quartile	First quartile	Median	Third quartile
All brides:						
All grooms-----	19.4	21.6	25.8	21.2	23.5	29.0
Single grooms-----	18.9	21.1	23.8	20.6	22.4	25.0
Widowed grooms-----	40.9	51.9	61.3	49.3	59.0	65+
Divorced grooms-----	23.3	28.3	39.7	27.9	34.7	44.1
Single brides:						
All grooms-----	18.9	20.6	22.8	20.7	22.9	25.5
Single grooms-----	18.8	20.4	22.3	20.5	22.2	24.4
Widowed grooms-----	25.1	35.0	49.2	34.7	47.8	60.5
Divorced grooms-----	20.5	23.3	27.6	25.5	29.2	35.8
Widowed brides:						
All grooms-----	41.4	51.3	60.4	42.1	54.2	65+
Single grooms-----	28.0	38.7	49.9	26.8	36.7	48.6
Widowed grooms-----	50.3	58.3	65+	56.0	63.8	65+
Divorced grooms-----	37.4	46.4	54.0	38.9	47.7	55.7
Divorced brides:						
All grooms-----	24.9	30.4	39.6	26.6	33.6	43.8

¹ "Districts" shown are election districts, the nearest equivalent to counties.
² Includes District I, Prince of Wales.
³ Geographically located within limits of Idaho, Montana, and Wyoming.
⁴ Marriage licenses issued.
⁵ Divisions are parishes.
⁶ Independent cities have the same status as counties and are listed after counties.

Section 2. Divorces

Table	Page
2-1. Estimated number of divorces and annulments and rates, with percent changes from preceding year: United States, 1920-69-----	2-5
2-2. Divorces and annulments and rates: United States, each region, division, and State, 1964-69-----	2-6
2-3. Reported annulments: United States, each region, division, and State, 1964-69-----	2-7
2-4. Percent distribution of divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1969-----	2-8
2-5. Median ages of divorced husband and wife at time of decree and at time of marriage: Divorce-registration area and each registration State, 1969-----	2-8
2-6. Median duration of marriage prior to divorce or annulment: Divorce-registration area and each registration State, 1969-----	2-8
2-7. Divorces and annulments by color of husband, by color of wife: Divorce-registration area, 1969-----	2-9
2-8. Estimated number of children involved in divorces and annulments: Divorce-registration area and each registration State, 1969-----	2-9
2-9. Estimated number of children involved in divorces and annulments: United States, 1953-69-----	2-9
2-10. Percent distribution of divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1969-----	2-9
2-11. Divorces and annulments by age of husband and wife at time of decree: Divorce-registration area and each registration State, 1969-----	2-10
2-12. Divorces and annulments by age of husband and wife at marriage: Divorce-registration area and each registration State, 1969-----	2-11
2-13. Divorces and annulments by race of husband and wife: Divorce-registration area and each registration State, 1969-----	2-12

Table	Page
2-14. Divorces and annulments by number of this marriage of husband and wife at time of decree: Divorce-registration area and each registration State, 1969-----	2-12
2-15. Divorces and annulments by duration of marriage: Divorce-registration area and each registration State, 1969-----	2-13
2-16. Divorces and annulments by number of children reported: Divorce-registration area and each registration State, 1969-----	2-13
2-17. Divorces and annulments by duration of marriage and number of children reported: Divorce-registration area and each registration State, 1969-----	2-14
2-18. Divorces and annulments by month marriage performed: Divorce-registration area and each registration State, 1969-----	2-16
2-19. Divorces and annulments: United States, each State and county, 1969-----	2-17

Sampling Variability of the Divorce Statistics

In the tables which present statistics based on data from probability samples of divorce records, small frequencies have high sampling variability, which limits their usefulness. The sampling errors are shown in table 3-8 in the Technical Appendix. It is suggested that any number smaller than those shown below be interpreted simply as "small" rather than as any more precise value. The true number would very probably be within 60 percent of the figure shown below. Figures for States shown as "zero" indicate that all records were tabulated and thus data are not subject to sampling variability.

¹Data are estimated.

²Districts shown were county equivalents prior to 1960 (then named "Judicial Divisions"). Data are not available for election districts, the nearest equivalents of counties beginning with 1960.

³Geographically located within limits of Idaho, Montana, and Wyoming.

⁴Division are parishes.

⁵Data are incomplete.

⁶Independent cities have the same status as counties and are listed after counties.

⁷Covington (city) figures included with Alleghany County.

⁸Galax (city, part) figures included with Carroll County.

⁹Fairfax (city) and Falls Church (city) figures included with Fairfax County.

¹⁰Galax (city, part) figures included with Grayson County.

¹¹Emporia (city) figures included with Greensville County.

¹²South Boston (city) figures included with Halifax County.

¹³Rockingham (city) figures included with Rockbridge County.

¹⁴Harrisonburg (city) figures included with Rockingham County.

¹⁵Franklin (city) figures included with Southampton County.

¹⁶Norton (city) figures included with Wise County.

SECTION 3. TECHNICAL APPENDIX

SOURCES OF DATA

Marriage and divorce statistics currently are based on information from two sources: (1) complete counts of events obtained from all States and (2) samples of marriage and divorce certificates from States meeting certain reporting criteria.

Complete counts of marriages and divorces are provided annually by State and local officials by county; marriages are also reported by month of occurrence. From these counts, totals are derived and rates computed for publication for each State, geographic division, region, the United States, and the marriage-registration area (MRA).

Sample records are selected from microfilm copies of the original certificates received from the registration offices of States and areas comprising the marriage-registration area and the divorce-registration area. The statistical information on these records, including data on the characteristics of marriages and divorces and the persons involved in them, is edited, classified, transferred to tape for computer processing, and tabulated in the National Center for Health Statistics (NCHS). The totals for the MRA derived from sample data differ slightly from those obtained from the complete count described above. All totals published for the divorce-registration area (DRA) are based on sample data.

Marriage and divorce statistics for the United States and for the registration areas are limited to events occurring during the year and registered within the specified area. Tabulations for States and other areas are by place of occurrence. Events occurring to nonresidents are included; marriages or divorces of members of the Armed Forces or other U.S. nationals that occur outside the United States are excluded. *United States* refers to the 50 States and the District of Columbia. Alaska has been included in the U.S. tabulations since 1959 and Hawaii since 1960. Data for Puerto Rico and the Virgin Islands for 1969 were not processed and do not appear in this volume.

Sources of marriage and divorce data since 1867 are shown in table 3-1; a description of these sources can be found in Section 7, Volume III, *Vital Statistics of the United States, 1960*.

Registration areas

Registration areas for the collection of marriage and divorce statistics were established in 1957 and 1958, respectively. Similar in concept to the registration areas developed earlier to promote national natality and mortality statistics, they included States with adequate programs for

collecting marriage and divorce statistics. Criteria for participation in the registration areas are

1. A central file of marriage or divorce records.
2. A statistical report form conforming closely in content to the Standard Certificate of Marriage (fig. 3-1) or Standard Certificate of Absolute Divorce or Annulment (fig. 3-2).
3. Regular reporting to the State office by all local areas in which marriages or divorces are recorded.
4. Tests for completeness and accuracy of marriage or divorce registration to be carried out in cooperation with NCHS.

When established, the MRA included 28 States and, in addition, all of New York except New York City, Alaska, Hawaii, Puerto Rico, and the Virgin Islands. Although not a charter member, Nebraska was admitted to the MRA soon after it was established, raising the MRA membership in 1957 to 29 States and New York except for New York City. The DRA included 14 States, Alaska, Hawaii, and the Virgin Islands. Table 3-2 shows when States and independent areas established central files and when they began participating in the MRA and DRA.

In 1968 Missouri entered the MRA, raising the number of participants to 39 States, the District of Columbia, Puerto Rico, and the Virgin Islands (fig. 3-3); no States were added in 1969. (Two independent registration areas, New Orleans and New York City, were part of the MRA in 1969. New Orleans and the rest of the State of Louisiana have participated in the MRA since it was established; New York State was a charter member, but the city of New York did not participate until 1965.) The DRA (fig. 3-4), unchanged since 1963, added four States in 1968 (California, Connecticut, Illinois, and Vermont) and two States in 1969 (Kentucky and New York), bringing the total to 28 States and the Virgin Islands. In the statistical tabulations *marriage-registration area* refers only to the 39 States, the two cities with independent registration, and the District of Columbia; *divorce-registration area* refers to the 28 States.

Marriages in the MRA accounted for 77 percent of all marriages in the United States in 1969 and divorces in the DRA for 59 percent of all divorces.

U.S. GOVERNMENT PRINTING OFFICE : 1967 O-241-643

Health Service, served as the principal means of attaining uniformity in content of documents used to collect information on marriages and divorces in the United States. These model reporting forms, prepared in close collaboration with the Public Health Conference on Records and Statistics, were first recommended to the States in 1954 for adoption January 1, 1955, and stood without revision through 1967.

Revised standard certificates were recommended to the States for use beginning January 1, 1968. New items on the Standard Certificate of Marriage are education of bride and of groom, a question on "date last marriage ended" for second or higher order marriages, and identification of the officiant as religious or civil. New items on the divorce certificate are a question on "approximate date couple separated," education, the name of "attorney for plaintiff,"

a question on the "number of previous marriages ended by death or by divorce or annulment," and an item giving the "total number of living children" in addition to the number under 18 years of age.

Each State and independent registration area determines the form and content of its vital records. Consequently the records vary in certain details. Although modified in each State as required by particular needs or by special provisions of the State vital statistics law, the marriage and divorce certificates of most States in the MRA and DRA conform closely to the standard certificates.

Table 3-3 lists items on the Standard Certificate of Marriage and shows which States had the items on their forms in 1969. Table 3-4 shows the same information for the Standard Certificate of Absolute Divorce or Annulment.

U.S. GOVERNMENT PRINTING OFFICE : 1967 OF-241-564

Nationwide counts

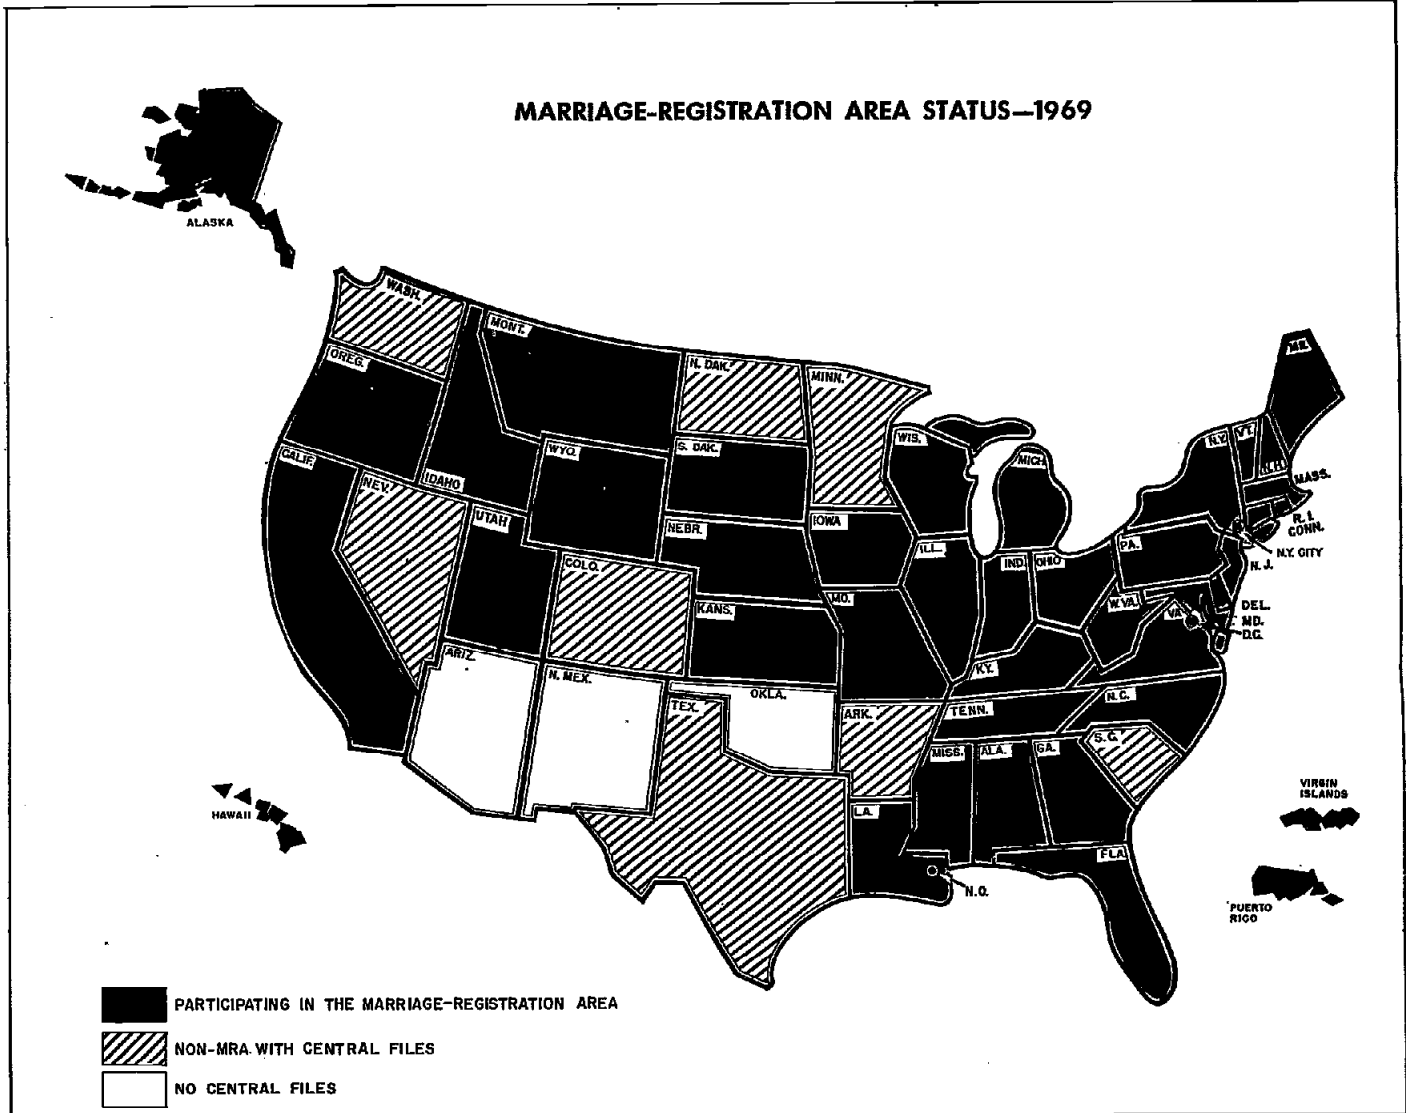

In 1969 the total counts of marriages by State and county were furnished from central files of marriage records for the 47 States maintaining them and for the District of Columbia. Counts for the five boroughs of the city of New York were supplied by the city clerk of Manhattan. In the areas without central files the counts were obtained from surveys conducted by registration officials. State officials reported for Arizona and Oklahoma and for some counties in New Mexico. County officials in a few New Mexico counties reported totals directly to NCHS on a monthly basis.

The number of marriage licenses issued rather than the number of marriages performed was reported for Kentucky and New Mexico. Marriages performed were reported

for the other 48 States and the District of Columbia. The number of marriage licenses issued is usually 1 or 2 percent greater than the number of marriages performed. (See page 2-1, Section 2, Volume I, *Vital Statistics of the United States, 1959*.) New York City reported marriages performed by county where license was issued.

Total counts of divorces and annulments by State and county were furnished from central files of the 45 States maintaining them and from the District of Columbia. (Although Louisiana maintains central files, counts for some parishes of Louisiana were obtained by NCHS directly from local officials.) For States without central files of divorce records—Arizona, Indiana, Minnesota, New Mexico, and Oklahoma—State officials conducted special surveys to obtain county totals.

FIGURE 3-3

Marriage totals for one county in New Mexico could not be obtained from State or local officials. In addition, divorces and annulments were not reported for one county or more in the following States: Arkansas (2), Louisiana (25 parishes), Missouri (1), and New Mexico (6).

The national total of divorces and annulments includes estimates for 24 parishes of Louisiana that did not report. Estimates of county divorce totals for Indiana were made by State officials. Estimates prepared by NCHS assume that the rate in nonreporting areas of the State was the same as that observed for the reporting areas.

Characteristics of marriages and divorces

Statistical information on characteristics of marriages and divorces is provided by the States participating in the

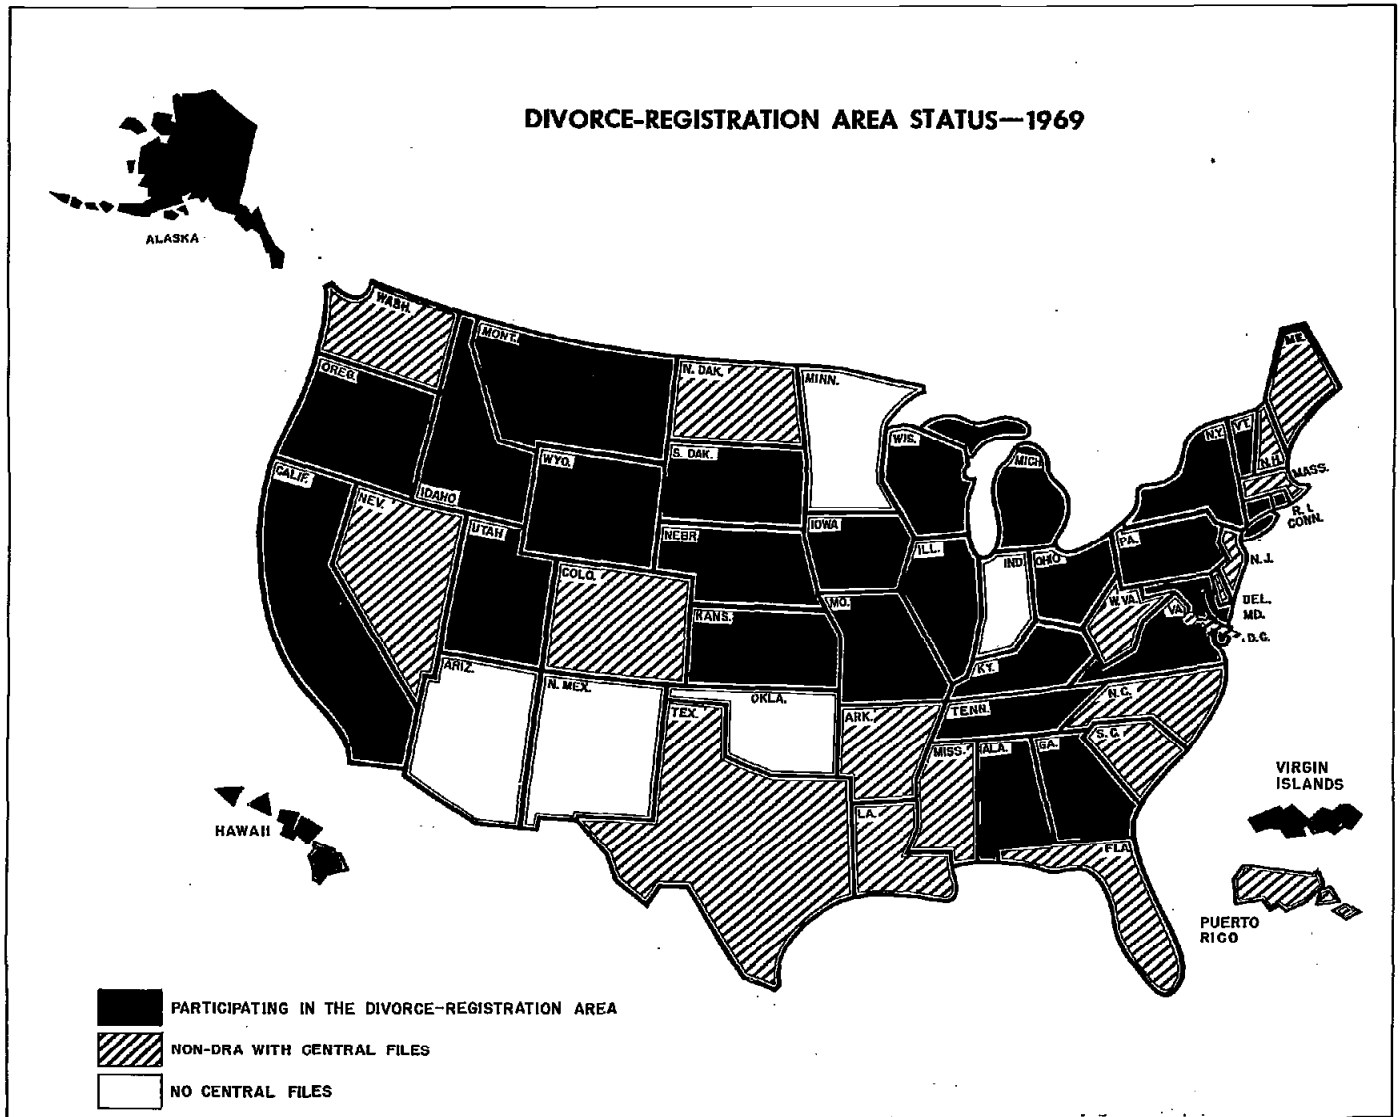

registration areas. Items that are adequately reported are processed from the sample records of each State.

For marriages in 1969 these items include place (State) of marriage, month and day of week of marriage, and the following items relating to characteristics of bride and groom: place (State) of residence, date of birth or age, race, number of this marriage, and marital status prior to this marriage.

For divorces the items include place (State) of divorce, number of children, month and year of marriage (from which duration of marriage is obtained), and the following items relating to husband and wife: date of birth or age, race, and number of this marriage.

Certain items previously coded and tabulated were dropped from the 1966-69 processing as a result of program reduction. For 1969 the item on type of ceremony was deleted for marriages. For divorces State of residence of husband and wife, State of

FIGURE 3-4

marriage, to whom decree was granted, legal grounds for decree, and identity of plaintiff were deleted.

Most of the items tabulated for marriages in 1969 were well reported by nearly all the States in the MRA. The marriage forms of all participating States contained an item for either age at marriage or date of birth or both items. The race or color item was on the certificates of all States except California, Michigan, New York, and Ohio. The item appeared on the Illinois form but was optional and was stated on less than one-half of their records. Forms for three States (Idaho, Maryland, and Oregon) did not ask for the number of this marriage but did include an item on previous marital status. Forms for two States (Ohio and Michigan) included information about the number of previous marriages of each person but not about the marital status of the previously married.

Race or color was stated on about two-thirds of the marriages performed in the MRA during 1969.

For the District of Columbia and the 34 States that requested both "previous marital status" and "number of this marriage" on their marriage certificates, first marriages and remarriages (referred to in the tables as "marriage order") could be identified if either item was stated. Similarly first marriages and remarriages could be identified for the five States that had only one of the two items on their certificates.

Idaho, Maryland, and Oregon requested only "previous marital status." For these States the number of not stated cases for the missing item (number of this marriage) was reduced by the number of cases assumed to be first marriages because previous marital status was stated as single.

Michigan and Ohio requested only "number of times previously married." Not stated cases for the missing item (previous marital status) were reduced by the number of

persons assumed to be single because they were said to have been previously married "0" times.

Of the items processed for divorces in 1969, date and place (State) where the decree was granted, number of children involved, date of marriage, and date of birth or age at time of decree were on the forms of all DRA States. However, Michigan and Ohio excluded the race item and Nebraska did not have number of this marriage. Also, several of these items were very poorly reported for at least half of the States. Date of birth, or age at divorce (needed to compute age at marriage), and number of this marriage were entered on less than 50 percent of the records from five States. Race, too, was poorly reported: it was stated on less than half the records for three States.

Tables 3-3, 3-4, 3-9, and 3-10 show which of these and other selected items appear on the records of the registration States and how well they are reported by each State.

Tabulation of the new items on the revised standard certificates began with 1968 data. When enough of the States in the registration areas have adopted an item and report it with a level of completeness that permits publication of the data for a group of States, tables will be added to the annual presentation.

SAMPLE DESIGN

Obtaining the records

Each year the States participating in the MRA and the DRA prepare microfilm copies of their records, which are purchased by NCHS. Further processing, including sample selection, code punching, verification, and tabulation, is carried out by NCHS.

For marriages the records refer to all marriages performed in 1969 within the 39 MRA States and the District of Columbia. For divorces the records refer to all decrees of absolute divorce and annulment that were granted during 1969 within the 28 DRA States.

Interlocutory divorce decrees for States that grant them are included among the records, usually for the year in which they were granted. Sampling marriage and divorce records for States in the registration areas was initiated in 1960. For earlier years data on characteristics had been compiled from predesigned tables submitted by the States.

Sampling procedures

The marriage sample was designed to yield estimates of State totals as well as frequency distributions. These estimates were made for the MRA and for each State in the registration area. A sampling rate was designated for each MRA State so that the selected sample for it would consist of at least 2,500 records. Five different sampling rates were used: all records, 1/2, 1/5, 1/10, and 1/20. The overall ratio for the MRA in 1969 was 1/9.

Sampling procedures for the divorce sample parallel those for the marriage sample. A sampling rate was selected so that the sample for each DRA State would contain at least 1,000 records. Four different sampling rates were

used: all records, 1/2, 1/5, and 1/10. Overall about 1/5 of the records were selected for the DRA sample in 1969.

Although each State's records were sampled independently, each group of States with the same sampling rate was treated as a stratum for the computing of sampling errors for the MRA and DRA. Estimated sampling errors are likely to be somewhat larger than those that might have been computed using each State as a stratum.

The sampling rates, number of events, and sample cases by State for 1969 are shown in tables 3-5 (marriages) and 3-7 (divorces).

ESTIMATING PROCEDURES

Area totals

The figures obtained from complete counts of events furnished by the State and local offices differ slightly from the estimated totals based on sample data. When possible, major differences between the sample totals and the independent counts for each reporting State are reconciled before the sample data are weighted and tabulated.

For marriages, the 1969 complete count and the sample estimate differed by less than one-tenth of 1 percent in the MRA and in the majority of the States; in no State did this difference reach 3.0 percent.

For the DRA, this difference was less than 1 percent and for all States, except two, it was below 2 percent. The sample for Utah was 22 percent below the expected number of records. For this State the missing records appear as "not stated" in the tabulation of divorces by detailed characteristics.

Frequencies

Procedures for estimating frequency distributions for various characteristics were similar for the marriage and divorce samples. Frequencies were estimated in two steps.

1. Each sample case was assigned a weight which was the reciprocal of the sampling ratio used to select the case. If a marriage record was selected from a State with a sampling ratio of 1/10, that record was assigned a weight of 10; if 100 percent of the records were processed from a State, each such record was assigned a weight of 1.
2. Tabulated counts consisted of summing the weights of the records. Thus each frequency distribution such as age at marriage of first-married brides is a sum of the weighted sample cases included.

The weights for all sample records are identical within each State. However, as shown in tables 3-5 and 3-7, the weights for marriage records vary from 1 to 20 and those for divorce records from 1 to 10 among the registration States. Therefore, for the MRA and DRA, any two approximately equal frequencies may have different sampling errors, varying with the proportion of cases from each stratum included in the estimate.

Percents and rates

Percents shown in the tables appearing in Sections 1 and 2 were computed from data excluding numbers of not stated cases. Rates appearing in these tables were based on population estimates developed by the U.S. Bureau of the Census, (tables 3-11 through 3-14). The population estimates refer to July 1, 1969, and include Armed Forces stationed in the United States but exclude the Armed Forces abroad.

Allocation

Because States in the DRA vary radically in the extent to which items are reported on the divorce records, no allocations were made prior to tabulation of the divorce data. On the marriage records, values were allocated for ages of bride and groom and date of marriage. These items have been reported with 99 percent or more completeness since 1960.

Children involved in divorces

Procedures for estimating the number of children reported in divorce suits presented a special problem. The number of children was estimated for each registration State, the DRA, and the United States. In order to obtain a State total, the category "children not stated" was first distributed to reflect the distribution of divorces by number of children reported. Then the estimated number of divorces with a given number of children was multiplied by the number of children per divorce (that is, the number of divorces involving one child was multiplied by 1, the number involving two children was multiplied by 2, and so forth). The sum of the products is the estimated number of children of divorced parents in a given registration State. The sum of State estimates for participating States is the estimate for the DRA.

In order to obtain national estimates for 1969, the average number of children per decree was computed for the 16 States that have reported children with a satisfactory degree of completeness (Alaska, Hawaii, Idaho, Iowa, Kansas, Michigan, Missouri, Montana, Nebraska, Ohio, Oregon, South Dakota, Tennessee, Virginia, Wisconsin, and Wyoming) and the national divorce total was multiplied by this average. This method was also used for 1965-68 and to revise figures for the years 1961-64 originally estimated by using a different method. Consequently data for these years shown in table 2-9 differ from figures appearing in Volume III, *Vital Statistics of the United States* prior to the 1965 issue.

SAMPLING ERRORS

Statistics for States where all records were used have no sampling error; the sampling error of each estimate based on sample data can be computed since all cases were selected with known probabilities. The sampling errors shown in tables 3-6 and 3-8 are the amounts which, when added to and subtracted from the estimated frequency, give

the interval within which the actual quantity being estimated would lie in approximately two out of three samples of equal size. For example, if the sample estimate of the number of wives under 20 years of age at the time of divorce in 1969 is 12,553, and if the sampling error for this estimate is 181, the probability is about 2/3 that this sample estimate is plus or minus 181 of the true total and about 95/100 that this estimate is plus or minus two sampling errors (362) of the true total. Each estimate based on a sample has a sampling error (σ).

To permit comparisons of sampling errors between registration States with widely varying totals of marriages or divorces, the frequencies for which sampling errors are shown are expressed as percents of State or registration area totals. The sampling error for an estimated percent based on the total number of events can be computed by dividing the sampling error shown for the frequency by the total number of events reported for the area. As an example of the procedure, the number of all Negro brides in Alabama is 9,160, or 20 percent of the total for the State. The sampling error shown in table 3-6 for this frequency is 259. By adding and subtracting 259 from 9,160, we obtain the interval 8,901 to 9,419; the chances are about 68 out of 100 that the actual number of Negro brides is in this interval. In order to obtain the sampling error for 20 percent itself, we divide 259 by the State total, 46,410, with a resulting sampling error of 0.5 percent. Thus the chances are about 68 out of 100 that the actual percent of all other brides in Alabama falls between 19.4 and 20.6.

The standard error of a proportion which is based on a subgroup in a State may be represented by the following formula

$$S_p = \frac{\sqrt{P_y^2 S_x^2 - P_x^2 S_y^2}}{P_y^2 N}$$

where: P_y is the proportion the denominator is of the total marriages of the State; P_x is the proportion the numerator is of the State total; S_y is the standard error of the denominator; S_x is the standard error of the numerator; and N is the total number of marriages for the State. Use of this equation can best be described by an example. Suppose that in Alabama 20 percent of Negro brides were previously married, and that we want to approximate the standard error of this proportion. Suppose also that the estimated number of Negro brides in the State was 9,160 and that 1,640 of these brides were previously married. The total Negro brides represents 20 percent (P_y) and 1,640 is 4 percent (P_x) of the 46,410 marriages performed in Alabama during 1969. From table 3-6 we find that, for Alabama, the standard error of 9,160 is 259 (S_y) and that of 1,640 is 126 (S_x). Substituting these values into the formula we obtain

$$S_{(.20)} = \frac{\sqrt{(.20)^2 (126)^2 - (.04)^2 (259)^2}}{(.20)^2 (46,410)} = .012$$

Therefore chances are about 68 out of 100 that the true proportion is between .188 and .212, or between 18.8 and 21.2 percent.

To determine if two proportions are significantly different, we divide the difference by the square root of the sum of the squares of their standard errors. If the quotient of this division is greater than 2, the probability that the difference between the two figures is due to chance is less than 1 in 20. To illustrate, suppose we wish to compare the proportion of previously married Negro brides for Alabama and Louisiana. Assume that the proportions were 0.20 with standard error .012 for Alabama and 0.29 with standard error .007 for Louisiana. Division of the differences by the square root of the sum of the squares of the standard errors gives us

$$\frac{(.29-.20)}{\sqrt{(.007)^2 + (.012)^2}} = 6.4$$

This value is greater than 2, and so the difference between the two proportions can be assumed to be significant.

NONSAMPLING ERRORS

In addition to the sampling errors described above, there are several other sources of variation that are little affected by the size or design of the sample. For example, items may be missing from reporting forms and therefore not reportable; items that do appear on a form may be vague and ambiguous; responses may be incorrect, unreadable, or missing; data may be submitted on outdated record forms; records may be erroneously included or excluded in the microfilm files sent to NCHS; or the editing or coding instructions may be inadequate to cover all cases.

However, for most of the data available from 1960 onward, the completeness and year-to-year consistency are evidence of the basic reliability and coverage of the marriage- and divorce-registration systems.

Obtaining the complete files of marriage and divorce records for processing by NCHS, a procedure initiated in 1963, permits special investigation into various types of nonsampling errors for specified areas. Such studies were undertaken in 1963 by examination of the microfilm files. A report of this research is included in Section 4, Volume III, *Vital Statistics of the United States, 1963*.

Incomplete reporting

Nonresponse errors in marriage and divorce data arise from two sources: (1) An item may not be included on the reporting form (not reportable); or (2) although the item may be on the form, there may be no response or the response may be illegible (not completed). Regarding the second source of nonresponse, some reporting forms include items that are badly worded and do not elicit responses

sufficiently precise to be classified. Sometimes when a State revises its form to include additional items, copies of the old form are still extensively used by registration offices until a supply of the new version is received. The items not included on the old forms are tabulated as "not completed."

Data presented in tables 3-9 and 3-10 show the proportions of not stated cases for specified characteristics of marriages and divorces for 1969. The proportions "not reportable" and "not completed" are shown separately for both the MRA and the DRA. Footnotes to entries under the characteristics identify the specific reporting areas for which an item was not reportable. Not completed cases were estimated by subtracting the not reportable responses from all nonresponses. Not completed cases were typically blank, but illegible responses and cases of records not received were also included in this category as well as some responses that were inappropriate. For example, numbers were written on some sample records instead of the specific previous marital status of the bride and groom. Checks of problems as they arose yielded evidence of only scattered instances of such responses. A major proportion of the not stated cases for marriages were due to the absence of items on some of the reporting forms. In contrast, the majority of not stated items on records of divorce or annulment arose from lack of response to some of the items requested on the reporting forms.

For divorces, items of personal information typically have been less complete than legal items and information about the marriage. One possible explanation of the incompleteness of personal items is that in several States the local court officials responsible for filing the form are not empowered to require completion of the reporting form but can only secure information from transcripts of court proceedings on the case.

Other sources of error

Inconsistent responses.—Inconsistency between entries for related items on the certificates occurs occasionally for both marriages and divorces. When age and date of birth are both reported, they do not always agree. Previous marital status is sometimes not consistent with number of times married or number of this marriage. These differences are arbitrarily reconciled before tabulation.

Ambiguous wording of items.—Some of the items are worded so that they do not yield information easily classified in standardized categories. Some briefly worded items actually require additional questions on the part of the local recorder in order to obtain the detailed information sought. Items where this type of error occurs most frequently were those requesting geographic place names (residence, place of marriage, and place of birth) and those requesting data about previous marriages.

Microfilm errors.—Errors in the arrangement of the records received on microfilm in NCHS sometimes occur when numbers on the records are out of sequence, missing, or duplicated or when records that are not part of the universe being sampled are erroneously included in the file.

A standardized order of records such as the one used for birth and death records has not yet been developed for microfilming the marriage and divorce records. In one area, permanent State files of marriage records were arranged by date licenses were issued rather than by a number assigned to licenses actually used in each county. Thus marriages occurring in any year may have been included in

files for earlier years. Special arrangements to locate and microfilm these records are made each year by NCHS.

Processing errors.—All coding was verified 100 percent; taped data were edited for impossible codes and for inconsistencies where possible. Instances of impossible codes and inconsistencies in information about previous marriages were rechecked to the records.

SECTION 3 - TECHNICAL APPENDIX

Table 3-1. Sources of Marriage and Divorce Data: United States, 1867-1969

Time period	Marriage	Divorce ¹
1867-86	Estimates prepared by National Office of Vital Statistics based on results of field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1887-88 by the U.S. Department of Labor.
1887-1906	Estimates based on data from field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.	Numbers and detailed statistics (legal grounds, duration of marriage, number of children reported, etc.) obtained in field survey covering 20-year period conducted in 1906-07 by the U.S. Bureau of the Census.
1907-15	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1916	Numbers collected through mail survey conducted in 1917-18 by Bureau of the Census.	Numbers and detailed statistics collected through mail survey conducted in 1917-18 by Bureau of the Census.
1917-21	Estimates prepared by Bureau of the Census based on records from selected States.	Same as for marriage.
1922-32	Annual collection by Bureau of the Census through mail query to States with central files and to counties in the remaining States.	Numbers and detailed statistics collected annually by Bureau of the Census through mail query to States with central files and to counties in the remaining States.
1933-36	Estimates by S. A. Stouffer and L. M. Spencer on basis of data available from selected States (<i>American Journal of Sociology</i> , January 1939).	Same as for marriage.
1937-40	Estimates based on transcript returns and mail surveys of State and county offices conducted by Bureau of the Census. Some detailed statistics for 1940 based on transcript program.	Same as for marriage.
1941-43	Estimates based on data from published State reports and from files of Bureau of the Census and Federal Home Loan Bank Board.	Same as for marriage.
1944-47	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices.
1948-56	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by State offices of vital statistics.
1957	Estimates based on figures for marriages and marriage licenses obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the marriage-registration area (MRA).	Same as for 1948-56.
1958-59	Same as for 1957.	Estimates based on figures for divorces and annulments obtained by National Office of Vital Statistics from State and local registration offices; detailed statistics based on pretabulated data provided by States participating in the divorce-registration area (DRA).
1960	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of marriage records designed to provide estimates for the United States, the four regions, the marriage-registration area, and each registration State. Totals of either marriages or marriage licenses by county and by month also tabulated in each State. These and totals estimated from samples were checked for consistency.	Statistics prepared in the National Center for Health Statistics from nationwide probability samples of divorce records. Records in the sample provided statistics on absolute decrees of divorce and annulment for the United States, the four regions, the divorce-registration area, and each registration State. Totals for each State by county also tabulated in each State. These and totals estimated from samples were checked for consistency.
1961-69	Statistics prepared in the National Center for Health Statistics for the MRA and each MRA State from probability samples of the marriage records collected by each MRA State. Pretabulated totals of marriages or marriage licenses by county and by month, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for MRA States, checked for consistency with totals estimated from sample records.	Statistics prepared in the National Center for Health Statistics for the DRA and each DRA State from probability samples of the records of absolute divorces and annulments collected by each DRA State. Pretabulated totals by county, reported for all States, used to compute totals for the United States, four regions, and nine geographic divisions; also, for DRA States, checked for consistency with totals estimated from sample records.

¹Includes reported annulments.

¹ Not stated data include not reportable (item was not on record of entire reporting area) and not completed (item was on the record but not filled in, or the number of records from a reporting area was incomplete).

² Not reportable.

³ Not reportable for remarriages in three registration States. For these States, total marriages include the following percentages of remarriages: Idaho, 42.0 percent of brides, 38.4 percent of grooms; Maryland, 23.5 percent of brides, 23.7 percent of grooms; Oregon, 22.9 percent of brides, 24.3 percent of grooms.

⁴ Not reportable for Cook and DuPage Counties.

⁵ Not reportable for remarriages in Michigan and Ohio. For Michigan, figures include remarriages of 23.8 brides and 24.7 grooms; for Ohio, figures include remarriages of 23.4 brides and 23.1 grooms.
